

Committed to providing an environment of trust, blending excellence in surgical judgment and expertise with dedication to our patients.

A multi-specialty, outpatient surgical facility

## An ambulatory surgery Center

Mid-Town Surgical Center is an ambulatory surgery center, which means we operate with a single purpose of providing high quality same day surgery without an overnight hospital stay. This practical alternative is appropriate when your surgery is not an emergency, and can be planned in advance with your physician. In most cases, you are discharged the same day and can recuperate in the comfort of your own home. This means less time away from work and your family, more convenience for you and ,less expense.

## A Multi-Speciality, outpatient facility

Mid-Town Surgical Center offers state-of-the-art medical equipment, giving patients skilled, comprehensive care throughout their stay, before and after the procedure. Dedicated operating facilities are available for surgical patients with spacious waiting areas and comfortable post anesthesia rooms.

## At Mid-Town Surgical Center you can expect:

- The latest advances in ambulatory surgical anesthesia procedures and technology.
- A comfortable, welcoming facility.
- Caring, friendly, highly skilled staff.
- State-of-the-art medical equipment.
- 100% BLS (Basic Life Support) certified staff.
- 100% ACLS (Advanced Cardiac Life Support) certified nursing staff.
- A co-founder and lifetime board member of Texas Ambulatory Surgery Center Society (TASCS).
- Member of the American Association of Ambulatory Surgery Center (AAASC).
- Member of the Federated Ambulatory Surgical Association (FASA).
- Licensed by The Texas Department of Health.
- Medicare certified.

Our facility offers patients and their families a smaller, more comfortable setting than what is usually provided in a traditional hospital. However, we continually invest in the latest technologies to ensure that your physician and expert team of medical professionals have the tools they need to treat your condition cost-effectively.

Physicians are welcome to tour the facility or refer patients to one of many specialists on staff.

A multi-specialty, outpatient surgical facility
